

Biodiversity Policy

Absolute Clean Energy Public Company Limited (“the Company”) is committed to conducting business sustainably while taking responsibility for the environment, including placing importance on the care and preservation of ecosystems and biodiversity. Accordingly, the Company has established a Biodiversity Policy to serve as a guideline for the operations of the Company and its subsidiaries (“the Group”) as follows:

1. Manage environmental and biodiversity matters in compliance with all relevant laws and requirements.
2. Assess the potential impacts of business operations on biodiversity, and establish measures to prevent, mitigate, and monitor such impacts.
3. Avoid conducting business in areas of biodiversity significance, such as World Heritage Sites, internationally significant wetlands, Man and the Biosphere (MAB) Programme areas, and Biosphere Reserves designated by UNESCO, and conservation areas designated by IUCN.
4. In cases where it is necessary to conduct business in biodiversity-sensitive areas, appropriate measures for biodiversity restoration and offsetting must be implemented.
5. Engage with stakeholders, particularly local communities surrounding business operation areas, to support the conservation and preservation of biodiversity.

This policy shall be effective from February 28, 2022 onwards.
